CAERPHILLY FOOD PARTNERSHIP

CAERPHILLY COUNTY BOROUGH GOOD FOOD CHARTER

OUR VISION

Good food is essential to the quality of life, learning and health for everyone in Caerphilly. This Charter sets out a vision and a joined-up approach for making Caerphilly a place where everyone has the opportunity and skills to grow, cook, buy and enjoy good food every day. It celebrates our heritage, natural environment and community spirit.

OUR PRINCIPLES FOR GOOD FOOD

HEALTH AND WELLBEING FOR EVERYONE

Access to affordable healthy food and to information that helps people make informed choices, should be a basic right for everyone. Learning about food should happen early and continue as we grow.

COMMUNITY AT THE HEART

Communities should have access to a wide range of growing, cooking activities, land, buildings and other resources to take more control of their food. Tackling food poverty, inequality and the impact this has on education, health and wellbeing should be a priority.

A GROWING LOCAL ECONOMY

Together we can boost the local economy by buying more Welsh food and supporting producers, suppliers and food businesses across Caerphilly. Local activity should give opportunities to local growers, producers and suppliers.

SUSTAINABLE AND CLIMATE-CONSCIOUS

Food production should conserve and protect land, water, biodiversity and the needs of future generations. Food should be processed, distributed and disposed of in ways that reduce waste and food miles, packaging and energy use.

WHAT YOU CAN DO AS A BUSINESS OR ORGANISATION

- Source food and ingredients locally and promote through menus, displays and marketing to support Welsh producers and the local economy.
- Offer healthy, affordable and sustainable food choices for customers and staff.
- Reduce food waste through better planning, recycling and surplus food donation.
- Cut down on single-use plastics and unnecessary packaging.
- Work with community groups, schools and local organisations on food projects and education.
- Embed sustainability and ethical food practices into everyday business operations and decision-making.
